

Working Party on Polymer Reaction Engineering Newsletter
December 20, 2006

In early 2007 we will be contacting WPPRE members who have registered on the site to begin work on the working party newsletter. This document will be similar to that put out by the International Polymer Colloids Group, and will consist of : (1) announcements of up-coming events of interest to the PRE community; (2) Brief abstracts of Ph.D. theses and publications put out by WPPRE members that will give others an idea of who is doing what, and where ; (3) a summary of the announcements, comments and dialogues posted on the site over the course of the reporting period. Typically, we hope to edit a newsletter twice a year.
